

Discover the edition F

Our system at its best

New features

Flowmeter

Allows you to measure and monitor the water flow

Accelerometer

Allows real-time detection and notification of sensor movement

Better autonomy

- Rechargeable batteries integrated to the control panel
- Longer lasting battery life in all wireless sensors

Temperature detection

Low temperature detection on all wireless sensors

Our technology allows

- Remote firmware update
- Better remote service capability
- Continuous status update

Mobile app at launch

- Simplified customer onboarding
- When you're away from home, you can program the system to shut off the valve automatically
- Integrated with smart home services
- Access your stats to help manage your water consumption

New design

Water-Protec cares about the planet

- Our product is made from recycled materials. The packaging is also made from recycled product
- We help everyone to better manage their water consumption

SERIE Our system at its best

The complete solution against water damage designed and manufactured in Canada

The Water-Protec smart valve stops the water flow in the following second, avoiding any damage that could have been caused by the water leak thanks to sensors installed in strategic areas of your property.

Features

Accelerometer

Allows real time detection of sensor movement and sends a notification

Better autonomy

Longer lasting battery life in our sensors

Low temperature detection

on all sensors and control panel

Our technology allows

- Remote firmware update
- Better remote service capability
- Live system status
- Statistics to help manage your water consumption

Useful!
information
at your
fingertips

Included in the kit :

- 1 stainless steel valve
- 5 wireless sensors
- 1 control panel
- 1 remote control
- 1 power supply
- 1 9V battery

Water-Protec cares about the planet

- Our product is made from recycled materials
- The packaging is also 100% recyclable product
- We help everyone to better manage their water consumption

Communication : RF - radio
frequency Compliances : FCC and
IC

water-protec.com

SERIE Our system at its best

Also available

Flow meter

- Measures and monitors water flow to detect possible leaks caused by plumbing
- Water consumption study function to help you reduce the waste of drinking water

Better autonomy of the system

- Rechargeable batteries built into the control panel

Water-Protec system advantages

- Stainless steel valve tested by Intertek-ETL and complies with CSA standards (125.3). Sizes available: 3/4" - 1.0" - 1.5" - 2.0" - 2.5" - 3.0" - 4.0"
 - Radio frequency system communication (915 MHz) with FCC and Industry Canada - IC.
 - Up to 60 identifiable areas, unlimited number of sensors
 - Audible alarm for 15 minutes in situation of water detection or problem
 - Our control panel can be connected to the domestic alarm system and advise the owner via their central supervision
- The control panel is equipped with a 9V battery to feed the system during a power failure.

Web platform web and Mobile application

Available on

- Our web platform is accessible through the browser of your choice, from all your devices.
- See the status of your equipment live, such as the opening status of your valve, the temperature and the status of your sensors
- Alarm log: consult the log of all alarms received by your equipment: water detection, low battery, lost sensor, and more!
- Enable SMS or email notifications for multiple phone numbers or email addresses
- Give access to your equipment's information to one or more individuals
- Close your valve remotely

Adapting to the needs of our customers and the market with innovative products is our priority!
