

Water damage prevention,

more than a product: **IT'S A SERVICE!**

Your needs evolve, **SO DO WE!**

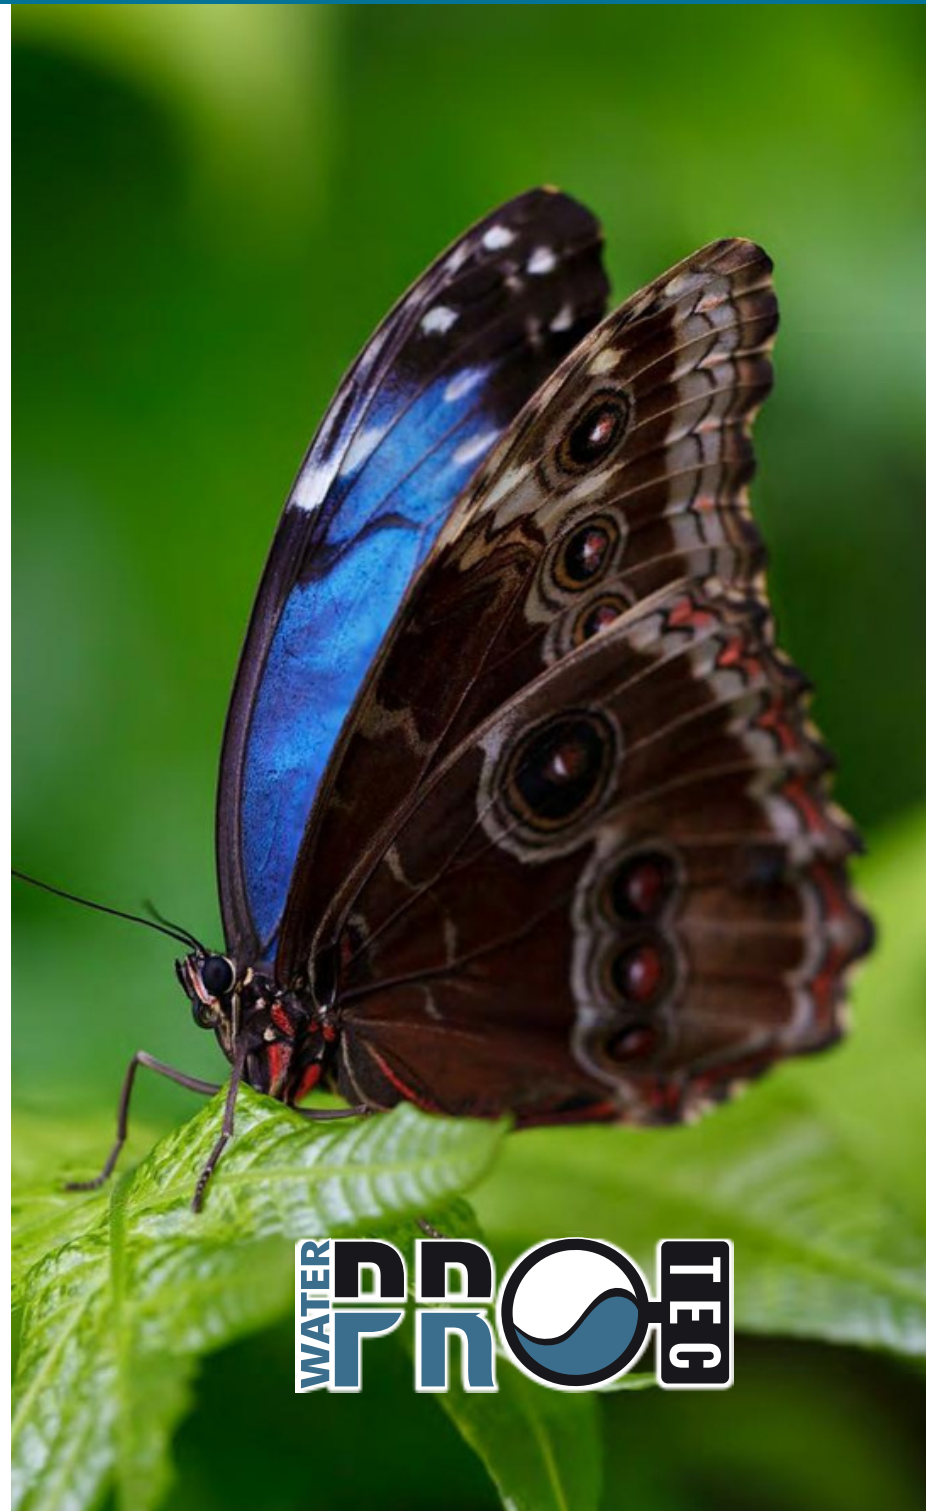

Since 2004

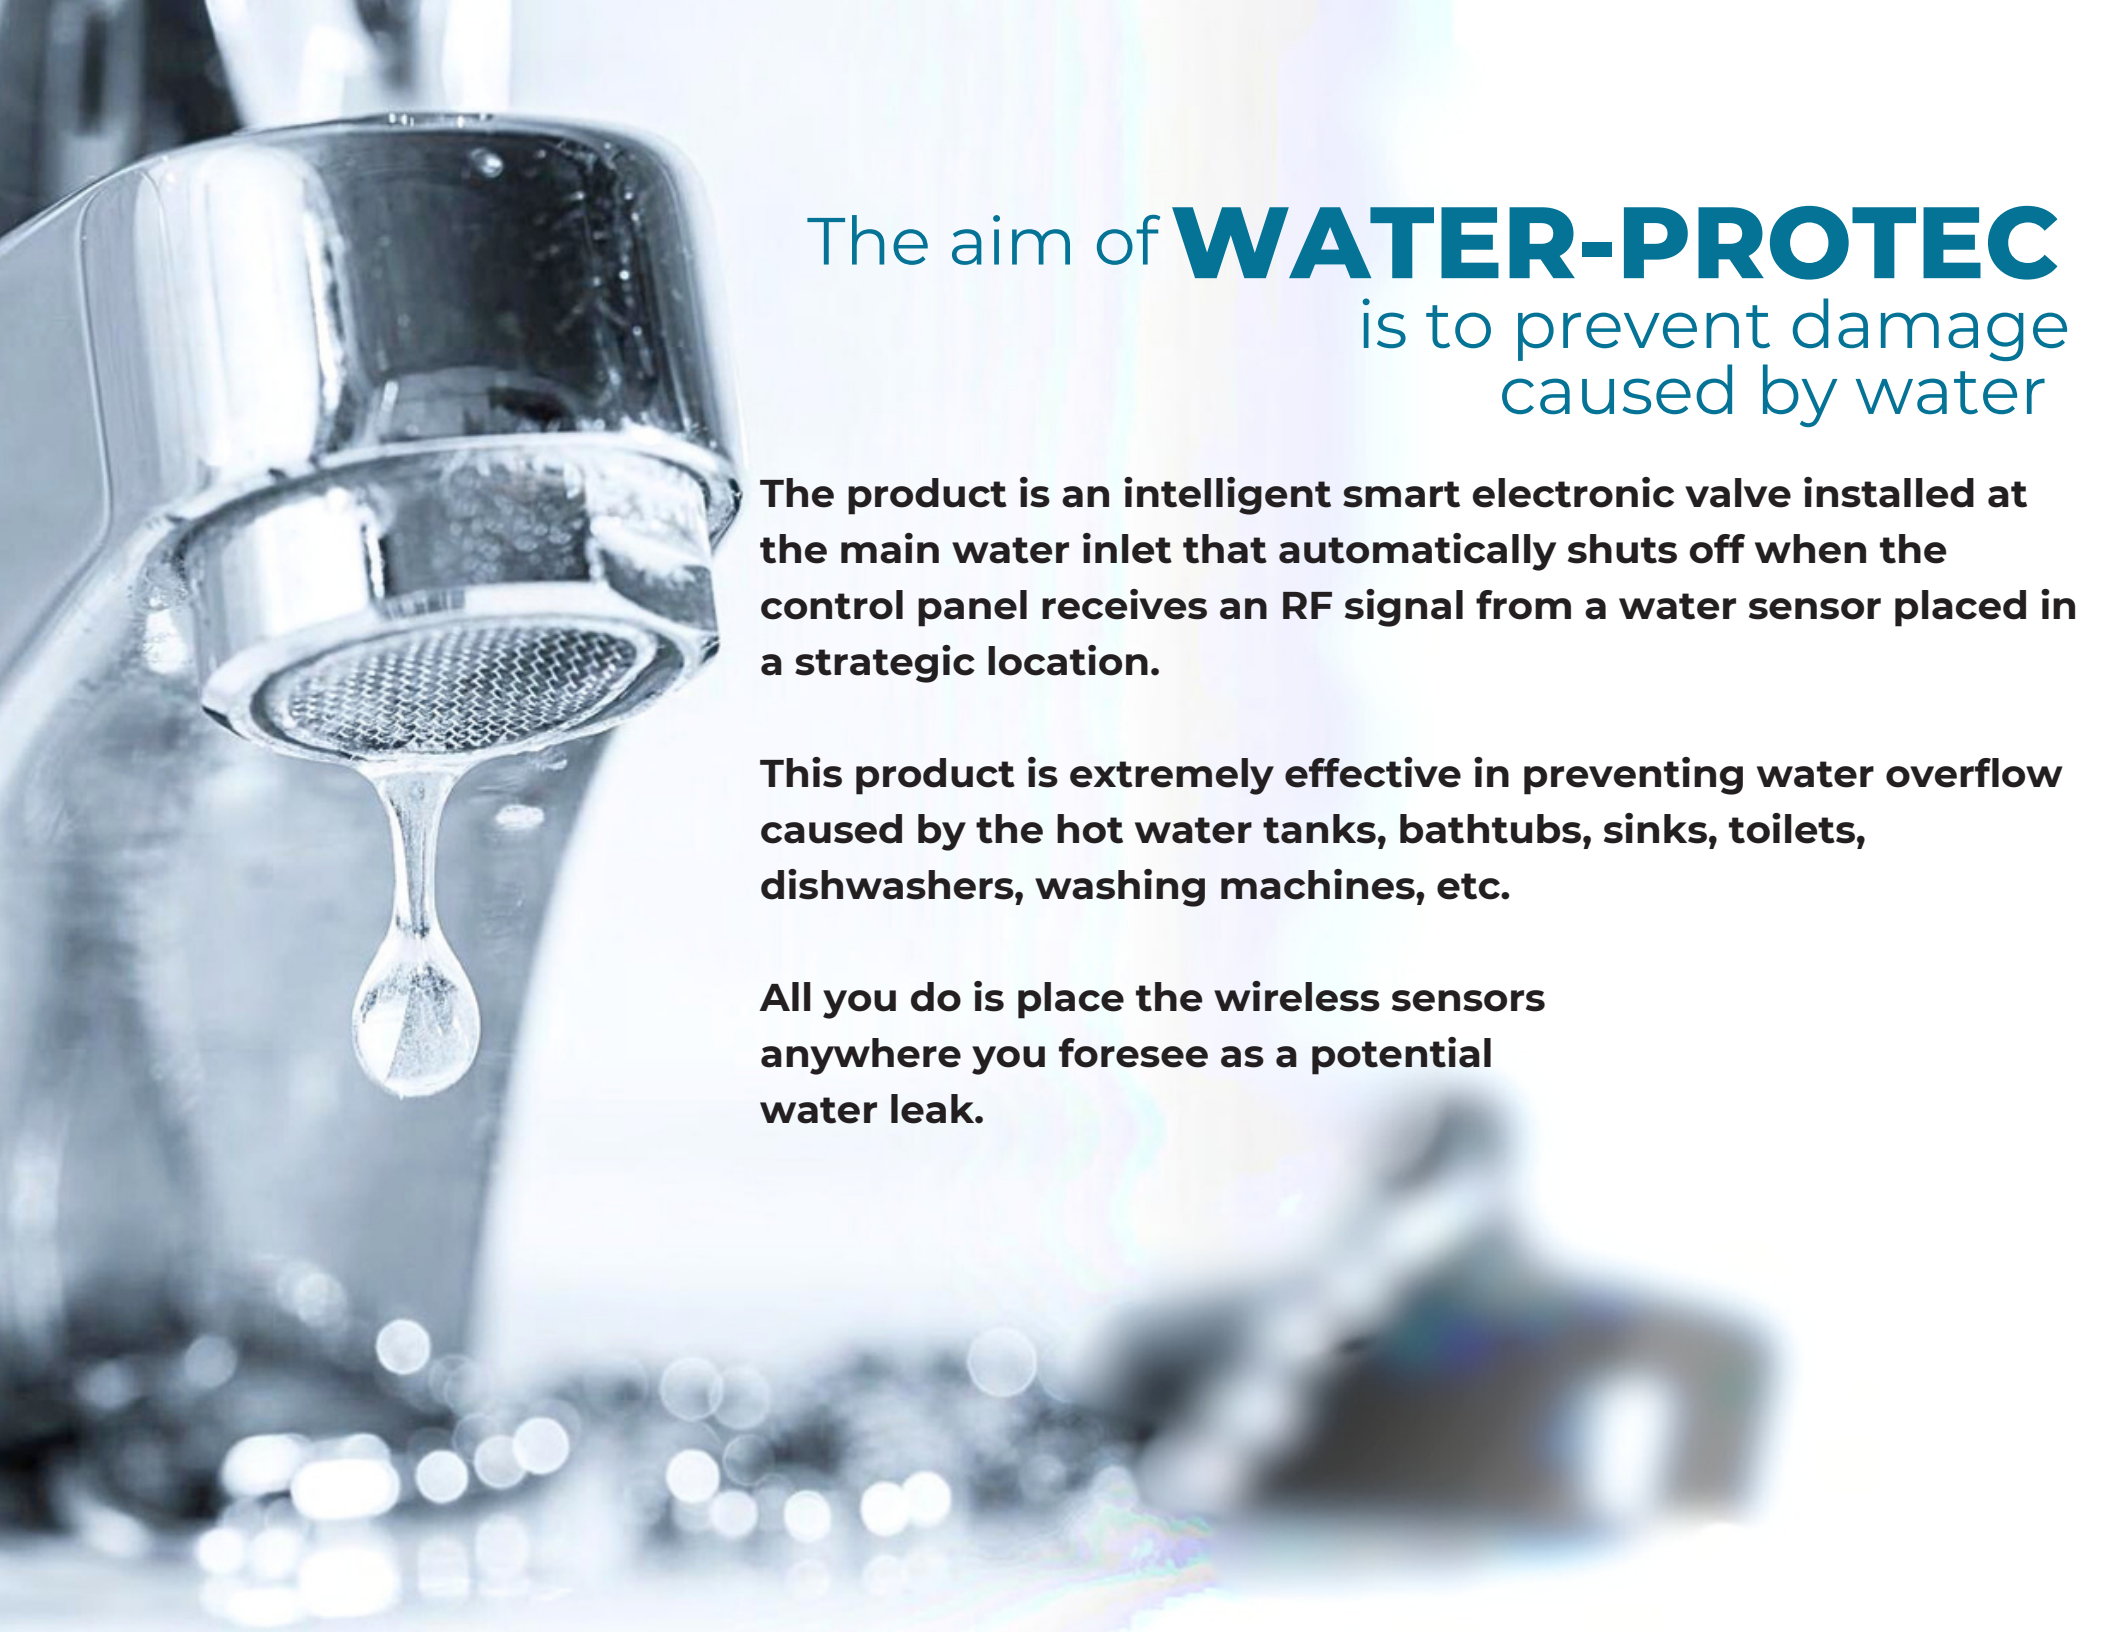

Water-Protec has aimed to protect its clients' living environments from water damage, in the easiest and most comprehensive way possible

In 2024

We are making the ecological choice of adding water monitoring to our range of tools and services, in order to help you consume drinking water responsibly.

We have also redesigned our packaging to be more eco-friendly: it contains no styrofoam, no plastic, and is made from 100% recyclable cardboard. Our sensors and control panels are also made from recycled materials.

The aim of **WATER-PROTEC**
is to prevent damage
caused by water

The product is an intelligent smart electronic valve installed at the main water inlet that automatically shuts off when the control panel receives an RF signal from a water sensor placed in a strategic location.

This product is extremely effective in preventing water overflow caused by the hot water tanks, bathtubs, sinks, toilets, dishwashers, washing machines, etc.

All you do is place the wireless sensors anywhere you foresee as a potential water leak.

What makes our product **ADVANTAGEOUS**

Ecological

In case of damage, you avoid wasting water because our detection system immediately closes the water inlet valve. You can also access your stats to help manage your water consumption

Peace of mind

Even in the event of a power failure, there is no need to worry about water damage thanks to a 9-volt battery. Moreover, if the ambient temperature is below 5° Celsius the valve will close automatically. Our system can also be connected to your alarm system, advise the owner via their central supervision as additional features.

Web Application

Be notified at all times(SMS/email)

Benefits and Advantages

- Instant Savings and Peace of Mind: Get significant discounts on insurance premiums, potentially saving you \$250 to \$5,000. Plus, many insurers offer incentives for installation, sometimes covering the cost.
- Immediate Leak Response: Our smart valve detects leaks and shuts off your water in a flash, preventing costly damage.
- Comprehensive Protection: With up to 60 customizable zones and an unlimited number of sensors, every corner of your property is shielded against water threats.
- Stay Informed: Receive instant alerts for leaks, sensor disturbances, or low temperatures, keeping you in control, no matter where you are. **Built in Freeze sensors!**
- No Extra Fees: Enjoy our user-friendly app and web platform without monthly charges. Track your system's status and receive detailed reports, all included.
- **Free Lifetime Monitoring!**
- Extended Warranty and Support: Benefit from a 1-year labor warranty, free preventive maintenance, and 24/7 technical help.
- Eco-Friendly and Efficient: Made from recycled materials, our products help you manage water use effectively, contributing to a healthier planet.
- Easy Setup and Maintenance: We handle everything from a free property evaluation to custom installation and ongoing service, ensuring your system always meets the highest standards.
- Advanced Technology: Features like freeze protection, flow metering, and remote control via smart home integration offer unparalleled convenience and efficiency.
- Durable and Reliable: Our stainless steel valve, tested and compliant with top standards, comes in various sizes to fit your needs, supported by a robust communication system.

Choose Water-Protec: Not just a product, but a comprehensive solution for safeguarding your property from water damage, with personalized service and innovative technology at its core.

**Certified installation available
for any type of project**

Certified installation

1. Installation planning for all your units (plumbing, electricity, etc.)
2. Adaptability: we own our technology and can easily adapt to any type of building
3. Issuance of a report and certification of installation for the building
4. Unparalleled after-sales service
5. 1 year labour warranty on all projects
6. Installation of a Wi-Fi network dedicated to the available equipment
7. No monthly fees for the use of our platform and application

Industrialcertified installation

We are the only water damage prevention company in Canada that is equipped to meet the needs of industries with water inlets larger than 2 inches in diameter.

Because we own the technology, we are highly adaptable and can quickly develop new solutions to meet the needs of your industry.

Web platform

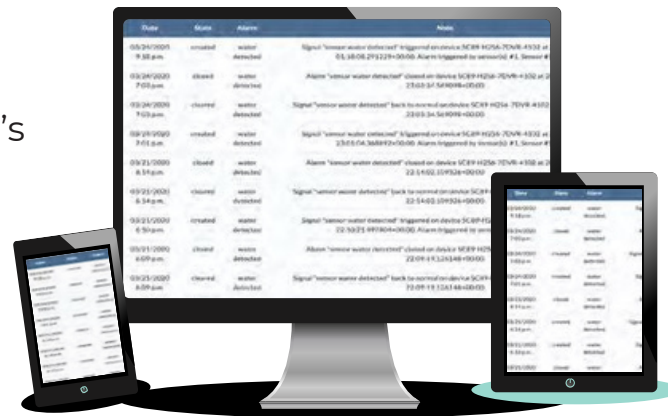

See the status of your equipment live, such as the opening status of your valve, the temperature and the status of your sensors

Alarm log: consult the log of all alarms received by your equipment: water detection, low battery, lost sensor, and more!

Enable SMS or email notifications for multiple phone numbers

or
email addresses

Give access to your equipment's
information to one or more
relatives

Mobile application

Close your valve remotely
Our mobile application, available on iOS and Android, allows you to access most of the features of our web platform on the go.

More :

Synchronize your equipment with your account more easily thanks to our smart scan tool

Receive notifications

Available on

Our web platform is accessible
through the browser of your
choice, from all your devices.

Administration Center

We provide a free **administration center** for property managers and condominium unions.

Find at a glance all the equipment installed in your units, separated by building, as well as their status and current alerts. Receive a notification with the unit number when a problem is detected.

You have access to your data: generate statistical reports on alerts received since the installation of your systems.

- Better **management** of all systems
- Consulting is visually **easy**
- Constant **monitoring**
- You'll be able to keep a **close eye** on your alarms
- All SMS or email **notifications** sent to **owners**

Service contracts available but not mandatory

ANOTHER ADVANTAGE OF WATER-PROTEC

Annual certification

- Yearly visit of your home or all of your units to validate the compliance of the installation following the initial installation.
- If necessary, replace broken or lost sensors * and reposition moved sensors
- Issuance of a new certification report with photos that can be sent to your insurer

Unlimited guarantee (some conditions apply)

- The basic warranty on parts is extended without limit
- Service calls requiring technicians are free of charge
- Free preventive battery change at the time of annual certification, when required

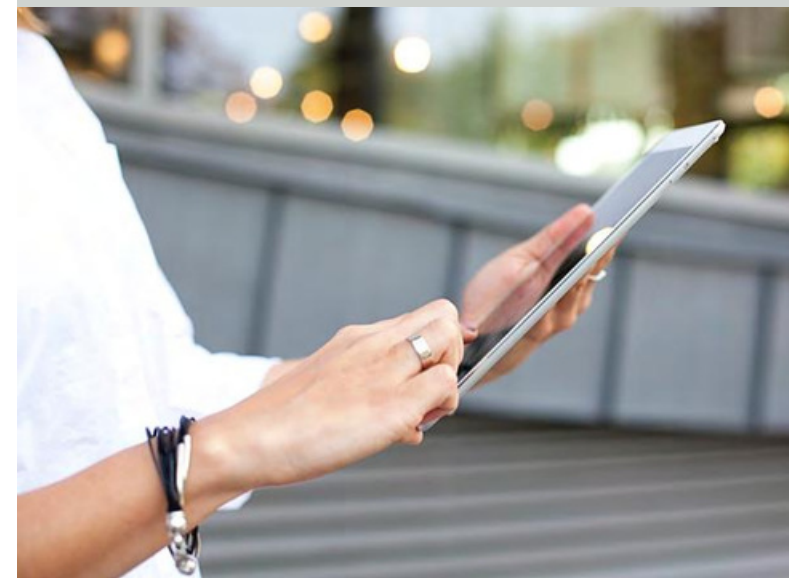

**Replacements not covered by the basic warranty are at the client's expense*

Our service contract ensures that your certified installation remains certified over the years. Available to individuals and on a building-wide basis for condominium unions and building managers.

The benefits of the service contract are also available to clients who did not take advantage of the certified installation service at the initial purchase.
